

## **COST FOR AUTOMATED OCR UPLOAD PROCESS**

The automated upload process uses commercial off-the-shelf software from Kofax that must be licensed by each client location. There is a one-time purchase cost of \$2,652.00 for a client license at each upload site. This one-time fee should be paid to Quality Associates, Inc, at the contact address shown on the attached quote. After the first year, there will be an annual \$442 software license maintenance fee for each site each year. Companies will be notified when these software license maintenance fee are due.

There is optional installation support available from Quality Associates, Inc. for those companies that wish to have the client software installed for them by the vendor. The use of a vendor for installation support is optional, and step-by-step instructions are available for companies that wish to conduct the installation using their own IT staff. If you are interested in obtaining installation support from Quality Associates, please contact them directly.

Note that companies using the automated upload process **MUST** have successfully installed the client software **BEFORE** their technical session with the eTDE team. Advance installation is necessary so that at the close of the technical session the company will be able to upload documents into the production eTDE system.
